DETAILED ACTION

1. Applicant's amendments and arguments have been fully and carefully considered. Applicant's petition to correct the inventorship has been entered.
2. The following is an examiner's statement of reasons for allowance:

The invention relates to a RSORT or spinning disc reactor which includes a hollow support element rotatable about an axis having a first external reaction surface and a second internal heat transfer surface and means for applying a heat transfer fluid to the second surface the first and second surfaces being in thermal communication with each other and the support element including an internal space bounded on the side by the second surface, wherein a plate or member is provided inside the hollow support element, the plate or membrane extending substantially over the whole internal space to define a first space between the second surface and one side of the plate or membrane and a second space between an opposed side of the plate or membrane and internal surface of the support element remote from the second surface leaving a gap at the edge of the plate or membrane to permit heat transfer fluid to flow between the first and second spaces wherein the opposed side of the plate or membrane is provided with vanes, fins or other projections with a mesh or gauze or foam, these being configured to prevent formation of free vortices in the heat transfer fluid. The concept of providing a hollow support element having a first, external reaction surface and a second, opposed, internal heat transfer surface, with a special plate or membrane provided to divide an internal space of the hollow support element into first and second spaces has not been taught and further including the provision of vanes, fins,

projections, mesh, foam or gauze on the o opposed side of the plate or membrane to help prevent the formation of free vortices in the heat transfer fluid has not been taught or fairly suggested singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.
